Reflection for week one lab:

- Nodejs was downloaded to the console
- The current working directory was JavaScript lesson 1
- The program for johns' salary is displayed correctly
- The program showing the output of sum1 and sum2 displays correctly in the console
- The program allowing the two numbers to be multiplied, divided, added and subtracted is run correctly in the terminal showing correct output.

WeekOneLab > index.js > ...

```javascript
console.log("This is my first programme!!")
console.log("Welcome Yunus, you made $88,000 last year")
const num1 = 10;
const num2 = 2;
const sum = (num1 + num2);//Adding two numbers
//Programme to output sum of two numbers
console.log("The sum of " + num1 + " " + num2 + " is: " + sum )

console.log(num1 + " divided by " + num2 + " is " + (num1/num2))
console.log(num1 + " multiplied by " + num2 + " is " + (num1*num2))
consoleg.log(num1 + " + " + num2 + " is " + (num1 + num2))
console.log(num1 + " minus " + num2 + " is " + (num1 - num2))
```

```
Yunus@admins-MacBook-Air WeekOneLab % node index
This is my first programme!!
Welcome Yunus, you made $88,000 last year
The sum of 10 2 is: 12
10 divided by 2 is 5
10 multiplied by 2 is 20
10 + 2 is 12
10 minus 2 is 8
Yunus@admins-MacBook-Air WeekOneLab %
```
